BERGMAN WEEK 2016

screening at BergmanCenter

july, 3 sunday @15:00 Aiòn#001

an audio visual research by: *_mar.core*

THE WORLD OF INGMAR BERGMAN AND SVEN NYKVIST THROUGH THE FASCINATING VISION OF AN ITALIAN

Aiòn#001 is the result of a long research developed by the italian composer and director *_mar.core*, focused on the induction of a deep emotional flow using music, images and particular sounds called Binaural Beat Frequencies. In a close connection with the sound-track, the Nykvist-Bergman's images from early movies, have been re-edited by *_mar.core* (award for the best film editing at New York City International Film Festival 2015), acquiring a wider and deeper evocative universality. Aiòn#001 works to induce a synesthetic perception in the auditory. This screening edition of Aiòn#001, summarizes the best audio results of the live performances toured in Scandinavia and Europe. The video parts, originally contained in three simultaneous projections, are joined in a single screen using the large scope size of contemporary movies.

Will be also introduced the digital publication "Aiòn#001_a synesthetic research on induction", that illustrates the project and its developments in the space of a decade of research of the author ".
